# ABSTRACT

**G**MC is a multipurpose token pegged to multiple business projects, delivered by experts in their sectors. As a result of this, GMC is a robust and secure token with over 1,800 traders globally backing and contributing to the token.

The team behind GMC have over 100 years' of combined experience in the Finance and Technology sectors, and are highly motivated and committed to the success of GMC. The elimination of the single point of failure flow in conjunction with the highly skilled and diversified team provide the foundation for GMC's success. A unique opportunity exists to become a GMC holder and grow your investment alongside the founders.

We look forward to having you onboard for this exciting journey together. Welcome to GRANDMASTER COIN.

# INTRODUCTION

In today's modern world people still must deal with three main factors impacting negatively on international payments and access to credit. Transactions across international borders using traditional money, referred to as fiat money are normally complicated, time consuming and expensive.

In 2009 Satoshi Nakamoto introduced Bitcoin as a digital analogue to gold: limited in supply, but secured by modern cryptography. Digital money, referred to as cryptocurrency is an electronic payment method which can be transferred between users with the help of computers, smartphones and the internet.

# BLOCKCHAIN TECHNOLOGY

The main innovation behind cryptocurrencies is that, instead of relying on trusted third parties such as central and commercial banks, transactions are recorded and propagated in a distributed ledger known as a blockchain.

In 2016, the Finnish Central Bank organized a seminar about blockchain in its bid to support local research projects on this technology. The seminar attracted participants such as local academics, regulators, and companies. The technology behind blockchain is busy changing money, business and the world.

In 2016, the Finnish Central Bank organized a seminar about blockchain in its bid to support local research projects on this technology. The seminar attracted participants such as local academics, regulators, and companies. The technology behind blockchain is busy changing money, business and the world.

# CRYPTOCURRENCIES

**B**itcoin and alternative cryptocurrencies are progressively enjoying widespread adoption and have been the investment buzzword since its creation. Experts in the field of cryptocurrencies believe that this upward trend will continue and even escalate in the years to come.

Cryptocurrencies have the unique potential to challenge existing systems of currency (fiat currency/traditional money) and payments. Cryptocurrency transactions are dependable, restriction-resistant, permission-less and private. Once a transaction is confirmed by the blockchain network, it becomes permanent and final. Therefore, a dispute process does not have the authority or power to charge it back like with other forms of money transfer.

Many other alternative cryptocurrencies have been developed and introduced to improve on Satoshi's original vision. Despite significant recent developments and innovation, the market for cryptocurrencies remains very small and specialized.

# INITIAL COIN OFFERING (ICO)

It is a new form of efficient and easy raising of financial resources. Any individual or a company can crowdfund any project or become an investor. Every ICO has two mandatory attributes – issuance of a fixed amount of the new cryptocurrency unit (token or coin) dedicated to the ICO and blockchain based transactions.

# CRYPTOCURRENCIES

A token or a coin is a cryptocurrency unit issued during an ICO. Buying certain amount of tokens allows the investors to crowdfund the project and ICO holders to raise funds. Every ICO issues a fixed amount of tokens/coins meant to be used as a potential source of profit once it goes on exchanges and/or as the

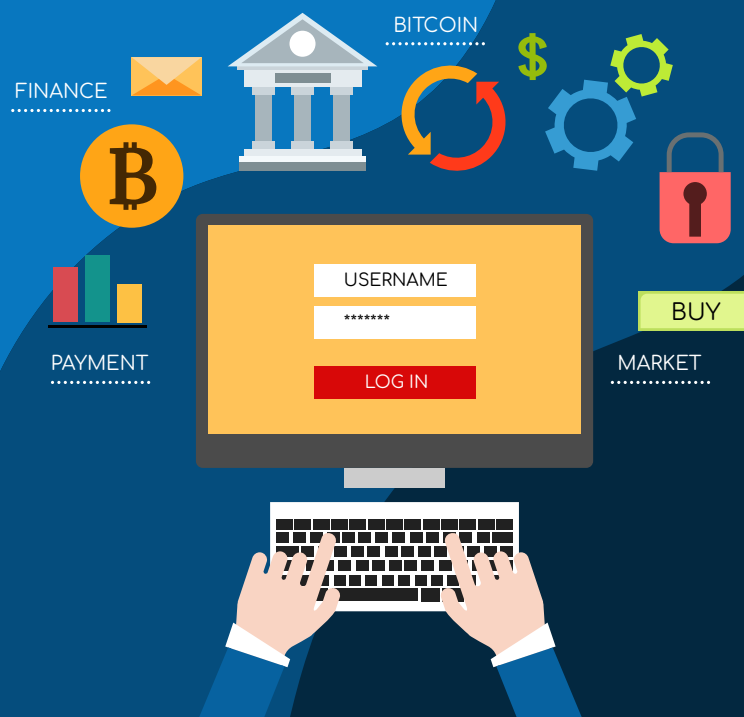

ICO assumes the release of a virtual asset (tokens or coins) that have their real value and are bought for currency. There is an exclusive right to purchase digital coins at a special price with a significant discount.

# HOW IT WORKS?

ICO is a profitable and convenient way for all participants to attract primary capital, in which the crypto currency actively participates. Use the attracted capital in the future can to implement the project or create a product.

The principle of the mechanism is quite simple - as virtual coins are tokens - digital coupons, you can buy tokens. The successful operation of the crypto currency will help the token to grow in price. It is this increase in value that is the basic principle of the ICO's work - after all, the meaning of investing is the hope for profit - ideally, a fast and large.

# OUR VISION

**G**MC coin is a diverse multipurpose token pegged to a group of businesses structured in different sectors, creating one of the only non-single point of failure tokens, backed by Finance

Our vision is to create a trustworthy, convenient and exchangeable token with longevity and continued growth potential. GMC coin is pegged to multiple businesses which have proven track records, both in terms of business success and in trading the Financial Markets.

Our collective community of over 1,800 traders worldwide are ready to adopt the robust and diverse GMC Coin. Our official partners have a global reach of 40,000 traders and over 200,000 individuals within their networks.

# OUR MISSION

To establish GMC coin as a digital token by providing a competitive advantage to the investor by outstanding levels of professionalism, ethics, integrity, service, expertise, innovation and ambition in the blockchain of cryptocurrency markets.

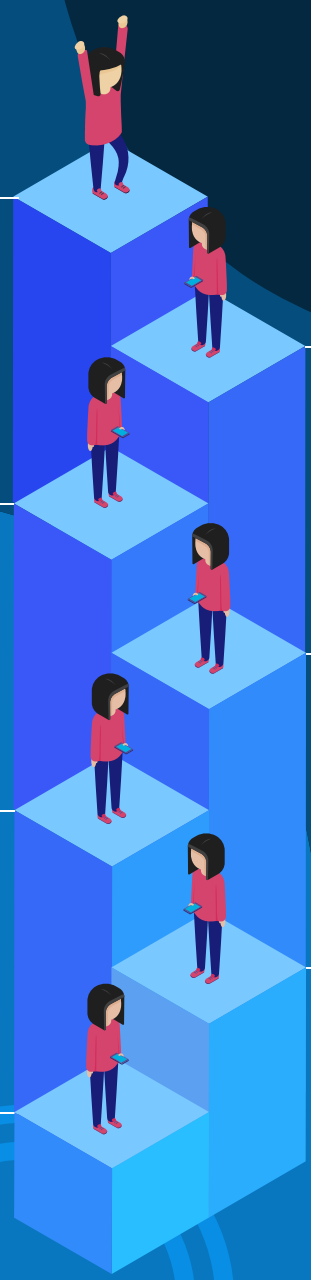

# REFERRAL PROGRAM

Every GMC member has a unique referral link, which can be shared with anyone; you would like to invite to start using GMC. Any new member, who registers using your referral link, becomes your direct referral.

When you promote GMC with your unique referral link and when the members you refer buy GMC coins you are rewarded with 30% reference bonus in Bitcoin of your direct referrals purchase of GMC.

This referral program gives you the ability to make up to 70% of users GMC's accounts. There are 7 levels of referrals. You can have as many direct referrals as you like and you will get a direct referral bonus 30% on ROI (return on investment) "from the 1st level" of users accounts and we have the indirect referral bonuses from ROI "from the 2nd level" is 20%, "from the 3rd level" is 10%, "from the 4th level" you will get 4%, "from the 5th level" is 3%, "from the 6th level" is 2%, "from the 7th" is 1% of users GMC's accounts. The bonus is added to your account's balance in BTC shortly after the purchase is confirmed.

# GRANDMASTER COIN: UNIQUE AND FUTURISTIC

**G**RANDMASTER COIN (GMC) is a cryptocurrency designed to facilitate private, secure and untraceable decentralized transfers.

GMC provides for cryptocurrency markets the best innovative perspective of other cryptocurrencies. GMC is coming to market as a master of other coins. With our unique algorithm for miners we provide optimized CPU and GPU mining. It is a big opportunity for miners who use CPU or GPU mining hardware. By the meantime with the power of Masternode we opened up our doors for social miners.

# OUR UNIQUE SERVICE

## PRIVACY

With our secure wallets and block explorers we provide unreadable wallet for our users.

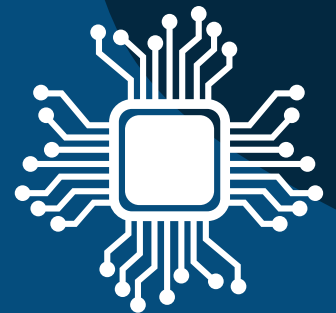

## SECURITY

From our central core we distribute to our miners unique access code, it offers each of miners are connected to our central core and at the same time decentralized process to blockchain. With this unique system we protect our miners and who use GMC coin and keep out from hackers.

## PRIVACY

Till this time who use CPU mining hardware or GPU mining hardware they don't need to change their hardware to mine GMC, because our unique algorithm works well in both processors.

# MASTERNODE

Masternode can be very vital to investors in the crypto-world, this is due to the fact that by operating it gives you more opportunity to get incentives. In other words, this means you can earn interests every day.

## UNTRACEABLE TRANSACTIONS

In case of our security policy and our HM technology there is no access to your transaction and IP record.

GMC offers private, secure, decentralized digital transactions. User friendly, it will allow anybody with a computer or smartphone to safely participate in today's digital currency markets with reduced worry of unwanted parties spying or hacking .

## BLOCKCHAIN NODE

With our new blockchain technology we developed decentralized system, that regulated by our central core. It means every time when transaction confirms by miners it's also confirming by central core. In this case we bring a new perspective of block chain technology – 2-step confirmation. In our high-speed central core we process confirmations in a second.

# ROADMAP

The development of the Company's platform started three years ago. More than 750K dollars has been invested in developing and carrying out the proof of concept. In this section, you will be presented with illustrations outlining our future releases and expansions, with detailed explanation text boxes.

## 2018 Q1

- Conception of Idea / began working on GMC Coin
- Team Formation
- GMC was established in New York, USA

The initial idea popped up in the visionary mind of the founder of the company. The creation of a new cryptocurrency and related secured services, both dedicated to the travel industry imposed itself as a disruptive and haunting idea.

## 2018 Q2

---

- HM technology
- Central Core

A starting team was gathered around the project and the full concept defined. Experts started to develop HM technology for untraceable transactions. It will allow anybody with a computer or smartphone to safely participate in today's digital currency markets with reduced worry of unwanted parties spying or hacking .

We provide security, freedom and independence to all people through blockchain technology to create a flourishing, decentralized world. We're committed to keeping blockchain systems decentralized.

Our decentralized system is controlled by our Central core. Every transaction reaffirms simultaneously by miners and the Central core. We bring a new perspective of blockchain technology – 2-steps confirmation. We process confirmations in a second In our high-speed central core.

## 2018 Q3-Q4

- Launched ICO Successfully
- Masternode integration
- CPU and GPU

Since we have launched successfully, mining can start and coins will be created. Our team worked hard to get GMC listed on all major exchanges for trading purposes.

We set up and operated a GMC Masternode, which is online 24/7 and helps provide additional security, reliability, and performance to the GMC blockchain.

GMC's mining algorithm is designed to be both CPU and GPU mining hardware friendly.

## 2019 Q1-Q2

- Work with Legal Partners
- Set Legal Entities
- Set up Wallet and Banking System
- Test Blockchain

We are currently working with a few legal partners to make sure all the regulatory and legal requirements are met for the ICO. Preparation for the ICO also involves the onboarding of experienced experts for our team. All legal entities would be set during this period. We also aim to set up and test our wallet & banking system.

Once everything is setup, our GMC Coin would be listed in our partner exchange. All efforts for finding the right partners for marketing & ICO operations would be emphasized too. We would carry out rigorous testing of our blockchain technology. GPU mining hardware friendly.

# 2019 Q3-Q4

- Online Trading Platform

We have identified that there is a requirement within the market to provide free and readily accessible information regarding cryptocurrencies and fiat currencies and as our backgrounds are primarily in Banking and Finance, we feel a duty to provide this.

Therefore, we will be launching a free interactive online platform available to members of the public to help break down any topics our users desire within the Cryptocurrency, Forex and Stock Markets.

Our market experts will be utilized for content production and communication with the audience on the chosen topics. We're exceptionally excited about providing no-cost education to the public, and see this as an essential part of the decentralized community we're creating. We've already commenced work on the prototype platform with our web programmers, to ensure it's released on schedule.

- Global Payment Solution

The GMC Coin Cash Card solution will then be developed, allowing people to pay with a physical card, bridging the gap between fiat and cryptocurrency. We intend on rolling this out in two phases, in order to provide enhanced flexibility to our users:

Phase One: Payments made using GMC Coin with the amount of the purchase

being debited directly from GMC Coin tokens held in the user's wallet; and

Phase Two: Creation and use of the GMC+ Card offering a unique cash card backed by our marketable securities finance model. Rather than tap into an

existing cryptocurrency portfolio, GMC+ Card users will be able to use credit as a valuable funding tool; for their business, lifestyle, family's future or investments.

Liquidating a portfolio of cryptocurrencies or other assets prematurely may

compromise your long-term objectives, so borrowing funds may be a better strategy to preserve assets in order to take advantage of investment opportunities or use for spending.

# CONCLUSION

Cryptocurrencies will change the world and GMC Coin wants to be there when it happens by offering an innovative and secure platform to allow the world to safely trade and exchange assets.

GMC coin will guide and eventually be the technology that gives both experienced and novice users a peek into the future of currency.

With this Token Crowdsale we offer you a new business model, which in our vision is bound to succeed.
